

INVITATION

The EIT KIC Raw Materials' MISSION

is to boost the competitiveness, growth and attractiveness of the European raw materials sector via radical innovation and entrepreneurship.

If you are:

- interested in RECYCLING,
- involved in RECYCLING,
- dealing with RECYCLING,
- doing RECYCLING,
- innovating RECYCLING,
- shaping RECYCLING,

then you will be interested in participating at our
WORKSHOP on

„Circular Economy – Recycling Technologies and Recycling Products“

Bay Zoltán Nonprofit Ltd. and its consortium
partners are pleased to invite you to the workshop on

on 9th June, 2016 at

Jarl Conference Center

(Váci út 92. 1133, Budapest, Hungary)

Within the frame of

project.

Participation is **FREE** of charge. Please see the **AGENDA** and **REGISTER online** at
REGISTRATION site, LINKED HERE: <http://www.eitrawmaterials.eu/2016/06/09/recycling-technologies-and-recycling-products-workshop-11347841/>

The scope of EIT Raw Materials will focus on metal and mineral raw materials. Bio-based and polymer materials will be covered in view of their substitution potential. Other materials will also be considered in the context of multi-material product recycling.

As the society awareness of raw materials and circular economy varies across Europe, due to diverse framework conditions throughout the European Union, the degree of open-mindedness for new technologies and innovations in raw materials differs in European regions.

www.eitrawmaterials.eu

As an important part of circular economy, we would like to measure what is the status of “refining and recycling” in the region, mostly in Hungary. The aRAWness project wishes to be a starting point for future networking and monitoring activities across Europe with a focus on society awareness of the circular economy. Hence, European perspectives will be aligned and the stakeholders and wider society will be made aware of EIT Raw Materials.

The overarching goal of aRAWness is to provide a better base for decision makers such as local and regional political actors (top-down) to raise the European society awareness of the circular economy and to provide a better transparency for European citizens (bottom-up) in this field.

During this workshop our main goal is to showcase interesting technologies and products in “RECYCLING” and

Come and make sure you won't miss anything important!
