

## **STRIDE Final Conference Communication Information**

The [Interreg Danube Transnational Programme STRIDE project](#) – standing for Improved energy planning through the Integration of Smart Grid concepts in the Danube Region – is led by the Local Energy Agency Spodnje Podravje (LEASP) together with seven project partners and eight associated partners from Slovenia, Germany, Austria, Czech Republic, Hungary, Croatia, Bulgaria and Bosnia and Herzegovina.

For the past two years, the STRIDE project provided, through knowledge transfer and development of planning tools, comprehensive support for regional and local policy makers for the improvement of energy planning. Within the project, regional partners carried out regional analyses and developed strategies, action plans, methodologies, a guidebook and a [open-source networking platform](#) to enable and accelerate the integration of smart grid concepts into regional and local policies.

Join the STRIDE project consortium on 21<sup>st</sup> November 2022 at the 5th [International IEEE Conference & Workshop](#) in Óbuda on Electrical and Power Engineering in Budapest, Hungary to learn more about how the STRIDE Methodology for Regional Analysis, guidebook and digital platform can be applied throughout the entire Danube region and beyond.

Registration for the STRIDE final event as a part of the international IEEE Conference is free of charge but required for participation at the event.
