This webinar is organized on the occasion of the conclusion of CIRCE2020 Project on circular economy, with the purpose to present project results and to speak about circular economy outlooks from the point of view of the different stakeholders involved, considering problems of the current growth model highlighted by this period of emergency.

### CIRCE2020 Project on Circular Economy

The project CIRCE2020, involving 5 different countries in Central Europe, aims to facilitate the transition from the linear economic model to the circular one in local productive districts of the project regions involved. Research and pilot actions in specific productive contexts has been carried out together with different communication and dissemination activities, aiming to increase awareness in economic players involved.
